## LAMIACEAE: THE MINT FAMILY IN THE FAIR OAKS HORTICULTURE CENTER WATER EFFICIENT LANDSCAPE

Many mint family plants make good water efficient plant choices. The family includes several culinary herbs that grow well in our climate and are often included in water-wise gardens (basil, mint, rosemary, lavender, hyssop, marjoram, oregano) in addition to many sages and other common garden plants.

Look for these shared qualities:

- Square stems
- Opposite leaves
- Tiny flowers
- Volatile oils in their leaves and stems, which gives them their entrancing fragrances and flavors (and usually makes them deer resistant as well)
